

American Wireless and Belkin Forge Strategic Partnership to Deliver VoIP Services Nationwide

CAMPBELL, Calif., June 22, 2005—Capitalizing on its leadership in wireless telecommunications distribution, American Wireless will expand its reach into broadband communications by forming a strategic partnership with Belkin Corporation. American Wireless will deliver Belkin's callEverywhere Broadband Phone Service through its national dealer network. By expanding into the growing market of broadband communications, American Wireless will enable its extensive network of dealers to widen its product mix and appeal to even more customers.

Belkin's callEverywhere Broadband Phone Service enables calls to be placed using an Internet connection and simplifies message management with advanced voice mail and calling features, and unique, integrated email and fax services. Voicemail can be accessed by phone or email and customers can listen to email via phone by text-to-speech.

American Wireless, one of the largest wireless master agents in the U.S., has a more than 20-year history of bringing wireless telecommunications and satellite radio and television products to customers in North America. At the forefront of trends such as prepaid communications and satellite radio, American Wireless is recognized as a key player in the industry.

"VoIP is a burgeoning market ripe with opportunity for our dealer network," said Harry Brix, CEO of American Wireless. "After evaluating many VoIP offerings, we chose Belkin because callEverywhere is the most robust and best performing product on the market. The combination of our large dealer network and Belkin's superior VoIP technology is a big win for customers."

"We are very excited to tap into American Wireless' extensive dealer network to further broaden the reach of our callEverywhere Broadband Phone Service," said Mark Reynoso, Sr. VP of Sales and Marketing at Belkin. "American Wireless' entrance into VOIP and Advanced Messaging services will reap huge rewards for its dealer network and customers alike."

About Belkin Corporation

Belkin Corporation, the global leader in connectivity solutions, offers a range of innovations for the computer, electronics, and mobile consumer. With a diverse and far-reaching product mix consisting of home and enterprise networking, audio video solutions, KVM (keyboard/video/mouse) and peripheral sharing, power protection and cabling, as well as USB and FireWire® devices, Belkin extends its reach to *Bluetooth*™, cellular, PDA, iPod®, and other solutions for mobile computing. Belkin has introduced multiple types of messaging services that allow users to send or receive email, voice mail, faxes, and mobile text messages through one IP-based portal, from any computer and web-enabled device. Belkin products are available through www.belkin.com as well as through a network of major distributors, resellers, and superstores.
